ADL Practical Experiment List

Sr.No.	Problem Statement
1	Create html pages for website like login, registration and about us pages • Atleast develop 4 pages • Add related images • Provide linking among pages
2	design the website for restaurant using HTML and CSS • Atleast develop 4 pages • Add related images • Provide linking among pages
3	design the website for hospital using HTML and CSS • Atleast develop 4 pages • Add related images • Provide linking among pages
4	design the website for library using HTML and CSS • Atleast develop 4 pages • Add related images • Provide linking among pages
5	design the website for AIML Department using HTML and CSS • Atleast develop 4 pages • Add related images • Provide linking among pages
6	Write a program demonstrating javascript functions and different validations • Provide validation for email
7	Write a program demonstrating javascript functions and different validations • Provide validation for Regex
8	Write a program demonstrating javascript functions and different validations • Provide validation for name and phone no
9	Develop a program to use of different layouts.

	Develop a app for demonstration of login page using linear horizontal layout
10	Develop a program to use of different layouts. Develop a app for demonstration of login page using linear vertical layout
11	Develop a program to use of different layouts. Develop a app for demonstration of login page using Frame layout
12	Develop a program to use of different layouts. Develop a app for demonstration of login page using absolute layout
13	Develop a app for demonstration of Registration form using various UI components such as Edittext, checkboxes, radiobuttons, Togglebutton ,and display users response in Textview
14	Develop a app for demonstration of Registration form using various UI components such as Edittext, checkboxes, radiobuttons, Togglebutton ,and display users response using simple Toast
15	Develop a app for demonstration of SMS and Telephony. For sending messages
16	Program to demonstrate Buttons, Text Fields, Checkboxes, Radio Buttons, and Toggle Buttons with their events handler.
17	Develop a app for demonstration of Login form using various UI components such as Edittext, checkboxes, radiobuttons, Togglebutton ,and display users response using simple Toast
18	Develop a app for demonstration of Login form using various UI components such as

	Edittext, checkboxes, radiobuttons, Togglebutton ,and display users response in Textview
19	Develop a app for demonstration of Contact us form using various UI components such as Edittext, checkboxes, radiobuttons, Togglebutton ,and display users response using simple Toast
20	Develop a app for demonstration of Contact us form using various UI components such as Edittext, checkboxes, radiobuttons, Togglebutton ,and display users response in Textview
21	Develop a app for demonstration of Implicit intent which shows the communication between two activities in same app
22	Develop a app for demonstration of Explicit intent which shows the communication between to the apple website and your app
23	Develop a app for demonstration of Simple toast implementation in app use atleast five UI elements
24	Develop a app for demonstration of Explicit intent which shows the communication between to the geeksforgeeks website and your app
25	Develop a app for demonstration of Explicit intent which shows the communication between to the tutorialspoint website and your app
